Role Definitions:

Accountable (A): One person is ultimately Accountable for a task, objective or decision, and has veto power over it. The Accountable Person must get the job done, either by doing it or by assigning Responsibility it to others.

Responsible (R): The Responsible person(s) do the actual work. Responsibility may be shared, but the Accountable Person must clearly assign the degrees of Responsibility. It is strongly recommended that there is only one Responsible Person for each task on the RACI Matrix.

Support (S): Provides extensive support but is not fully responsible for the function.

1 *Notes: All functions are to be carried out within agreed and established NCA management arrangements and schedules of delegation.*

2 *The Independent Technical Advisor may be called on to provide Support to any of the tasks as required by the Accountable or Responsible Person. This over-arching support role is not detailed on the RACI Matrix for clarity.*

3 *Director, Major Projects and Manager, Lake and Dam is Responsible for Quarterly Audits of Process and Supports Annual Validation and 5 yearly Functional Audits*

4 *Independent Technical Advisor is Responsible for Annual Validation and 5 yearly Functional Audits*

5 *Depending on the nature of the project and resourcing status, the Accountable Person may assign other resources as appropriate with the Responsibility for project delivery.*
