

PROJECT NO: 253
PROJECT NAME: 3RD BATTALION, FIJI INFANTRY REGIMENT
HEADQUARTERS
DESIGN SERVICES CONTRACT (INTERNATIONAL) (DSCI-2022)
INVITATION TO REGISTER INTEREST
INFORMATION DOCUMENT NO. 01

To: All Applicants

Pursuant to clause 4 of the Invitation to Register Interest, Applicants are advised that the table below, which sets out questions raised by Applicants and corresponding responses provided by the Commonwealth and the attachments referred to therein, is issued as an Information Document.

No	Question	Response
1.	Given this is a first stage submission of a two stage procurement, a detailed brief has not yet been provided for review. Identification and selection of the most appropriate sub consultant team would ideally be conducted to align specific experience, and skill sets with the nuances within such a brief. Clause 1.1 (i) and (h) seem to suggest consultant selection would occur as per my note above , however, Schedule B, clause (h) infers that sub consultants should be nominated as part of this ITR. Please confirm if you require us to propose: a. a full consultant team; b. only select consultant disciplines at this stage, or; c. no consultants noting they will form part of the second phase of the procurement should we be successful.	At this ITR stage, Applicants are requested to demonstrate the capability and experience of the proposed consultant team, including any key subconsultants intended to deliver the services. Where Applicants do not possess all required capability in-house, they should identify the proposed subconsultants they intend to engage to address those capability gaps and provide details requested by paragraphs (f), (g) and (h) of Schedule B to the Invitation to Register Interest. It is not necessary for all subconsultants to be formally appointed at the ITR stage. However, Applicants should provide sufficient information to demonstrate how the required disciplines and specialist services will be delivered. This information will be considered when assessing the overall capability, capacity and suitability of the proposed team. If Applicants are invited to the next RFT stage of this procurement, it is anticipated that short-listed tenderers will be requested to provide details of any changes to their proposed subconsultants (and the reasons for these changes) as against those nominated in the corresponding schedule in their Registration of Interest
2.	Clause 1.4 list the value of the works as A\$10m - \$15m Could you please confirm if this is:	This A\$10-15m figure is GST exclusive and is the estimated value of the construction cost only of the project works.

	a. ex GST or inclusive; b. total project value or only construction cost.	
3.	We seek clarification regarding the approach to delivery that would be preferred by the Commonwealth for this project. Specifically, we would appreciate guidance on whether a modular or prefabricated construction approach—developed and assembled in Australia and then transported for installation in Fiji—would be considered or potentially welcomed as part of a proposal.	The Commonwealth has not prescribed a preferred delivery methodology at this ITR stage. Applicants are encouraged to identify any innovative and efficient approaches they consider appropriate for delivery of the Project. As part of the Preliminary Proposal requested in Schedule A to the Invitation to Register Interest, Applicants should describe (among other things) an approach to maximising opportunities for Fijian industry participation, workforce engagement, capability development, and sustainable economic outcomes and as otherwise described in that Schedule A. Such information is to be provided for evaluation purposes.
4.	As the ITR documentation references maximising Fijian supply and local labour input, could you please clarify if the preference is strictly for local (in-country) delivery models and materials, or is there scope to propose a delivery model that incorporates prefabrication off-shore while still maximising opportunities for Fijian industry participation?	The Commonwealth seeks to maximise opportunities for Fijian industry participation, workforce engagement, capability development and sustainable economic outcomes. Applicants should also have regard to the requirement to maximise the use of locally sourced materials where consistent with project requirements. The Commonwealth has not prescribed a specific delivery model at the ITR stage. Applicants may propose solutions that incorporate both local and offshore resources, materials or capabilities, provided they clearly demonstrate how their proposed approach maximises meaningful participation by Fijian industry and supports local economic outcomes and on the basis requested by Schedule A to the Invitation to Register Interest.

Dated: 05 August 2026

Signed:

ITR Administrator on behalf of the Commonwealth

Note:

This is an "Information Document" notwithstanding that AusTender may describe it as "Addenda" or an "ATM Document".
